

$\downarrow\downarrow\downarrow\downarrow$ Checklist of Student Health Requirements for Clinical/Field Placement $\downarrow\downarrow\downarrow\downarrow$

 Physical Exam – Must be completed using UConn Physical Exam Form (page 2) Color Vision Screening required for all programs (6-plate minimum) Clearance for N95 Mask Fit Testing required for all programs – Provider only needs to certify that student is medically eligible to be fitted for N95; UConn will arrange for fit testing if required
 MMR – Positive IgG titers required; documentation of prior vaccination not accepted First Step: Schedule and complete bloodwork Next Steps: If titer(s) are negative/equivocal, at least one booster required followed by repeat titer(s) 6-8 weeks later; provider may recommend two boosters, 28 days apart Non-Responder: If repeat titer(s) are negative/equivocal, student will be considered non-responder and non-responder form will need to be completed (page 4) Submit to ADB/Complio: Titer labwork; (as needed) required booster(s), repeat titer, and/or non-responder form
 Varicella – Positive IgG titer required; documentation of prior vaccination not accepted First Step: Schedule and complete bloodwork Next Steps: If titer is negative/equivocal, at least one booster required followed by repeat titer 6-8 weeks later; provider may recommend two boosters, 28 days apart Non-Responder: If repeat titer is negative/equivocal, student will be considered non-responder and non-responder form will need to be completed (page 4) Submit to ADB/Complio: Titer labwork; (as needed) required booster(s), repeat titer, and/or non-responder form
 Hepatitis B – Positive HBsAb titer required; documentation of prior vaccination not accepted First Step: Schedule and complete bloodwork Next Steps: If titer is negative or equivocal, begin repeat Hep B series (3-dose traditional or 2-dose Heplisav) Non-Responder: If repeat titer is negative/equivocal, student will be considered non-responder and non-responder form will need to be completed (page 4) Submit to ADB/Complio: Titer labwork; (as needed) required boosters, repeat titer, and/or non-responder form
Tdap – Current Tetanus, diphtheria, and acellular pertussis vaccine dated within 10 years
COVID-19 Vaccine – Completed two-dose or single-dose COVID-19 vaccine plus a booster - OR - UConnapproved medical or non-medical exemption (Note: Exemptions may not be accepted by all agencies)
Seasonal Influenza Vaccine – Required annually from 10/1-4/1 (receive 8/1-10/1)
Polio – Only required for Nursing and Long-Term Care Admin programs Option 1: Submit to ADB/Complio documentation of four childhood OPV/IPV doses administered before age 8 Option 2: Submit to ADB/Complio documentation of positive Polio 1 and 3 titers Option 3: Submit to ADB/Complio documentation of one dose of adult Polio vaccine
Tuberculosis – Annual Testing Requirement Option A (preferred for all programs): QuantiFERON or T-Spot Blood Test (IGRA) First Step: Schedule and complete bloodwork for test; if positive, proceed with Option D below Submit to ADB/Complio: Labwork showing test result
 Option B (required PPD option for most programs): Two-Step Mantoux PPD Skin Test First Step: Schedule and complete PPD #1 Next Step: 7-21 days after PPD #1, complete PPD #2; if any test is positive, proceed with Option D below Submit to ADB/Complio: Implant/read dates and results for each PPD
 Option C (acceptable PPD option only for Athletic Training, IONM, Pharmacy & Social Work): Single-Step PPD First Step: Schedule and complete PPD test; if positive, proceed with Option D below Submit to ADB/Complio: Implant/read dates and results for completed PPD
 Option D (only for students with positive TB test/history of TB): Chest X-Ray & Screening Questionnaire First Step: Schedule and complete Chest X-Ray (must be dated within 12 months) Next Steps: Complete TB Screening Questionnaire including provider attestation (page 3) Submit to ADB/Complio: Chest X-Ray result and TB Screening Questionnaire

↑↑↑ Checklist of Student Health Requirements for Clinical/Field Placement ↑↑↑

↓↓↓ Physical Exam Form to be Completed by Provider **↓↓↓**

Dear Provider: As a student in one of UConn's health professions programs, your patient is preparing to begin a clinical or field placement as part of their degree. The student can provide a checklist of requirements to be completed in addition to the physical exam below. Note that all requirements are carefully curated to comply with our agency affiliation agreements. Therefore, some items may differ from standard school admission requirements or recommendations for the general public. Some quick notes that may be helpful:

- **Physical Exam N95 Clearance** Student does not need an N95 fit test. Physical Exam form below asks you to indicate whether they are medically eligible to be fitted for an N95 mask (required per OSHA guidelines). UConn will arrange for fit testing if required.
- Titers, boosters, and repeat titers Titers required for MMR, Varicella, and Hepatitis B. If student's primary titer is negative/equivocal, they must receive at least one booster and have a repeat titer at the appropriate interval after final booster.
- **Non-Responder** If student's primary titer is negative/equivocal, they receive booster(s), and their repeat titer is negative, they will be considered a non-responder and will need to submit a completed non-responder form with provider attestation.
- Tdap vs. Td All students must have a current Tdap (within 10 years). Td is not acceptable.
- Polio (only required for some programs) If student's childhood vaccine records are unavailable, they must have Polio 1 and 3 titers
 or single dose of adult Polio vaccine. We know these items are uncommon. If ordering is causing difficulty, please consider referring
 student to travel medicine clinic or similar practice.
- **Tuberculosis** Testing is an annual requirement with IGRA as the preferred option. If student opts for PPD, many programs require two-step PPD with documented implant and read dates for each PPD. If student has history of positive TB test or history of TB, chest x-ray dated within 12 months and annual screening questionnaire with provider attestation are required (see page 4).

个个个 Physical Exam Form to be Completed by Provider 个个个

↓↓↓ Annual TB Questionnaire – ONLY for history of TB and/or positive TB test **↓↓↓**

This form is *only* to be completed by student and provider if student has a history of TB or if any current TB test (blood test or PPD) is positive. In addition to this questionnaire, student must submit most recent chest x-ray (dated within 12 months).

If student does not have a history of TB or a current positive TB test, completion and submission of this form will not lead to compliance. Please refer to checklist on page 1 of this packet and/or module 4 of the Compliance Overview Training Video Series for your program, available at http://ocpc.office.uconn.edu/students.

Student Questionnaire

Have y	ou experienced any of the following symptoms	in the past year? Please in	dicate yes or no for	each item.				
1.	Persistent productive cough?		□ Yes	□ No				
2.	Coughing up blood?		□ Yes	□ No				
3.	Chest pain?		□ Yes	□ No				
4.	Shortness of breath / difficulty breathing?		□ Yes	□ No				
5.	Unexplained fever lasting more than 3 days?		□ Yes	□ No				
6.	Unexplained night sweats?		□ Yes	□ No				
7.	Unexplained sudden weight loss?		□ Yes	□ No				
8.	Unexplained fatigue / run down feeling?		□ Yes	□ No				
9.	Unexplained swollen lymph nodes or masses in y	our armpit or neck area?	□ Yes	□ No

↑↑↑ Annual TB Questionnaire – ONLY for history of TB and/or positive TB test ↑↑↑

↓↓↓ Non-Responder Form – ONLY if Repeat Titer(s) Negative **↓↓↓**

Note to Provider: This form is only to be used in cases where the individual was fully immunized, has a negative/equivocal primary titer, and receives at least one booster but, despite repeat immunization, has a negative/equivocal repeat titer.

Note to Student: This form must be submitted to ADB/Complio using the corresponding category/requirement. For the form to be approved, you must document all preceding steps including negative/equivocal primary titer, booster(s) at appropriate intervals, and negative/equivocal repeat titer. Your program will be notified of your non-responder status so that your clinical/field placement agency can be notified as appropriate.

Part One - To be completed by provider

Please check immunization(s) for which individual is considered a non-responder:
Measles/Rubeola – Individual has received full MMR series, primary IgG titer was negative/equivocal, individual received at least one MMR booster, and repeat IgG titer was negative/equivocal.
Mumps - Individual has received full MMR series, primary IgG titer was negative/equivocal, individual received at least one MMR booster, repeat IgG titer was negative or equivocal.
Rubella - Individual has received full MMR series, primary IgG titer was negative/equivocal, individual received at least one MMR booster, repeat IgG titer was negative/equivocal.
Varicella – Individual has received full Varicella series, primary IgG/ACIF titer was negative/equivocal, individual received at least one Varicella booster, repeat IgG/ACIF titer was negative/equivocal.
Hepatitis B – Individual has received full Hep B series, primary HBsAb (surface antibody) titer was negative/equivocal, individual received full repeat series (3-shot or 2-shot), repeat HBsAb titer was negative/equivocal.
By signing below, I certify that I have counseled the individual regarding their non-responder status including susceptibility to the disease(s) checked above, precautions to minimize potential exposure, and the need for medical evaluation if exposure occurs.
Provider Signature: Date:/ Phone:
Provider Name (printed): Address/Stamp:
Provider Type: MD DO APRN PA
Part Two – To be completed by student Please review carefully and check the appropriate statement(s) based on the immunization(s) for which you are considered a non-responder:
Measles, Mumps, Rubella, and/or Varicella – I understand that I will not be allowed to provide direct care for patients with known active infections of a disease to which I am not immune. If it is discovered that I have been exposed to a disease to which I am not immune, I understand that I will not be able to attend clinical/field placement until I have provided negative serological results after the contagious phase of the incubation period for the disease.
Hepatitis B – I understand that avoiding exposure to blood is the primary way to prevent transmission of Hepatitis B. Methods to minimize risk of such exposure include proper use of personal protective equipment (PPE); observance of aseptic technique; use of sterile, single-use, disposable needles and syringes; prompt and proper disposal of sharps via sharps containers, etc. If I am exposed t blood or body fluid that is positive or potentially positive for hepatitis B surface antigen, I understand that I should immediately seek medical care so that I may be treated with Hepatitis B immune globulin (HBIG) post- exposure prophylaxis to minimize risk of disease.
By signing below, I certify that I have reviewed the above information and understand my status as a non-responder for the immunization(s) indicated by my healthcare provider in Part One above.
